Subject: Lowerline Scanning Next Week

George,

Would you like to have a call to discuss plans to conduct the scanning in the Lowerline area next week? Erik and I spoke a little this morning and I wanted to offer our assistance in mechanizing things if possible. We have an ATV that can be used. Has 2" receiver hitches front and back as well as baskets. We could mount bars to hold an array if that would work for you all. Just need a couple of specs. Also have a hitch mounted basket for a vehicle that can be used to hold an array also. We can fabricate the mounts as long as we know the detector diameters. Used a similar system in NM for the AUM assessments and it worked well.

Thanks
David
